

**TRICHOMONIASIS (*Trichomonas vaginalis*)**

	Drug	Adult dosage	Pediatric dosage
Drug of choice: <sup>1</sup>	Metronidazole	2 g PO once or 500 mg bid x 7d	15 mg/kg/d PO in 3 doses x 7d
	OR Tinidazole <sup>2</sup>	2 g PO once	50 mg/kg once (max. 2 g)

- Sexual partners should be treated simultaneously with same dosage. Metronidazole-resistant strains have been reported and can be treated with higher doses of metronidazole (2-4 g/d x 7-14d) or with tinidazole (MMWR Morb Mortal Wkly Rep 2006; 55 [RR11]:1).
- A nitroimidazole similar to metronidazole, tinidazole appears to be as effective as metronidazole and better tolerated (Med Lett Drugs Ther 2004; 46:70). It should be taken with food to minimize GI adverse effects. For children and patients unable to take tablets, a pharmacist can crush the tablets and mix them with cherry syrup (*Humco*, and others). The syrup suspension is good for 7 days at room temperature and must be shaken before use (HB Fung and TL Doan et al, Clin Ther 2005; 27:1859). Ornidazole, a similar drug, is also used outside the US.
